

Classes in JavaScript

<https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Classes>

Classes in JavaScript

```
class Person {  
  constructor(name) {  
    this.name = name;  
  }  
  
  speak() {  
    return "Hi, my name is " + this.name;  
  };  
}  
  
var eirik = new Person('Eirik');  
eirik.speak();
```

Classes in JavaScript

Classes are "blueprints" or "factories" for objects of a specific shape with a specific behavior
