Promises Exercises

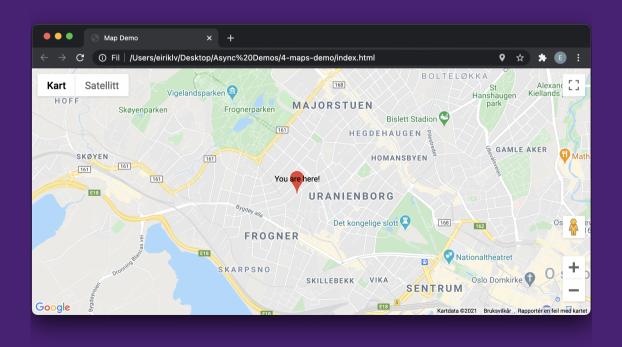

Google Maps API

Map markers:

https://developers.google.com/maps/documentation/javascript/markers

٦.

Start with a new map that is centered on your location - then add a map marker (see documentation) to your current location with the label "You are here!"

2.

You have been provided a set of locations with coordinates and information about each location - it can be found at:

https://www.vullum.io/academy/places.json

2.

Fetch the locations from the API and show each of them as a marker on the map
