Promise Methods

Promises

Promise.all

```javascript
var getAllResponses = Promise.all([
    fetch('http://myapi/1/1'),
    fetch('http://myapi/1/2'),
    fetch('http://myapi/1/3')
])

getAllResponses
    .then(function(responses) {
        // responses -> [{...}, {...}, {...}]
    })
    .catch(function(error) {
        //... if one of them fails
    })
```

Also check out - Promise.allSettled

Promises

Promise.race

```javascript
var getResponseOrTimeout = Promise.race([
  fetch('http://myapi/1/1'),
  new Promise(function(resolve, reject) {
    setTimeout(reject, 5000);
  })
])

getResponseOrTimeout
  .then(function(response) {
    // ...
  })
  .catch(...)
```
